About us

Established in 2013 and based in Riga, Ritausmas Steel Constructions is one of the leading metalworking services provider and material supplier to many companies operating in different industries across Europe. Our long-term experience and leading edge equipment entail high quality of metalworking services and steel constructions.

Highly skilled experts provide full cycle of services from technical drawing to end product. We are a trusted supplier of certified material: plates, beams, angles, RHS, bars etc. of various thickness and grades.

Currently we are successfully operating in Baltics, Sweden, Norway, Denmark and expanding into new markets as well. We operate in accordance with ISO9001, EN1090, EN3834 certificates and all our products and services are certified accordingly and meet the requirements of EN standards. The overall production area is 6000 m².

Metalworking and Steel Structures

We provide metalworking services for various industries and purposes using our advanced machinery. We specialize in providing gas/plasma and laser cutting, bending, welding services and manufacture of prefabricated steel parts and light steel structures (handrails, balconies, gates, highway noise barriers, foot bridges, highway sign panels etc.) as well as any other bespoke steel structures by request.

Equipment

Laser cutting machine Bystronic Bystar 4025

Width up to 2500mm
Length up to 6500mm
Power 6kW

Laser cutting machine Trumpf TruLaser 5030 Classic

Thickness up to 25mm
Width up to 1500mm
Length up to 3000mm
Power 5000Wt

Press brake Bystronic PR400/6200

Thickness up to 15mm
Length up to 6000mm
Power 400tns

Gas/Plasma cutting & drilling machine MGM Omnicut MS300

Thickness up to 220mm
Width up to 4m
Length up to 27m
Drilling up to 50mm

CNC 3D&2D pipe/profile cutting, drilling and threading machine Omnicut MS300

Pipe/profile length up to 12000mm
Pipe diameter up to 500mm
Wall thickness up to 50mm
Drilling&threading up to 50mm thick material
